Strong & Durable Plastic Pallets for Every Industries

An ISO 9001:2015 Certified Company

**SPANCO**

# Introduction

We "**SPANCO STORAGE SYSTEMS**" is a leading manufacturer and Supplier of high quality plastic pallets. Established in 1998, we started with only one molding machine. Today, we have extensive range of **Industrial Plastic Pallets**. The offered range of pallets consists of Industrial Storage Pallets, Four Way Entry Pallets, Two Way Entry Pallets, Rackable Pallets, Poly Pallets & many more.

These are specially designed and developed using the best quality materials to enable them with high tensile strength and excellent lifting capability. The offered range of products are highly demanded across the globe because of their wide application in various industrial sectors. Moreover, we provide these pallets at reasonable prices and with many customized solutions. The Plastic Pallets which are considered an ideal substitute and a favorable alternative to conventional wooden/ steel pallets. These pallets are not hampered by the inherent problems of swelling, rotting, termites and fungal infection that is there with the steel or wooden pallets. We have designed these pallets for optimal load bearing capacities with strong and durable design.

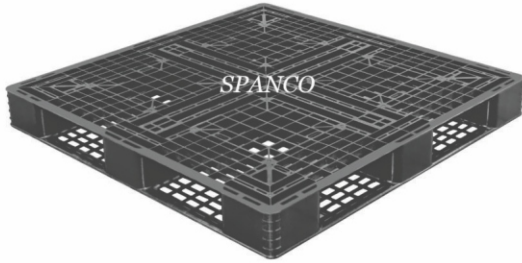

To assure a streamline business process, we have created a robust infrastructural set up, sprawling over a large area, so that all in house process can be integrated with each other. We carry out product designing, manufacturing, quality checking, packaging, storing and delivery processes in various specialized segments of our infrastructure. All these procedures are strictly monitored by our experienced team of quality controllers.

Under the leadership of our mentor, **Mr. Sanjay Virmani**, we have earned a credible name in the industry. His unmatched domain experience and ethical business practices have enabled us in maintaining a healthy working environment in the industry.

## CAUTIONS FOR PLASTIC PALLET APPLICATION

**SPANCO** Plastic Pallet are made and tested with reference to international standards. However, the performance requirement does not cover all conditions found in the pallet usages due to various conditions exist in material handling and warehousing. Damage or undesirable results may occur due to improper use & handling of the pallets or in exceed of permitted load as specified in the specifications.

1. Pallets are design for handling, storage and transporting of goods, do not use the pallet other than its intended purpose
2. Do not exceed permitted load as specified in the specifications
3. Be careful on slippage pallet surface when stained with liquids such as oil & grease
4. Do not use damage / broken / distorted pallet
5. Do not modify or do any post-processing such as drilling or cutting
6. Do not keep pallet close to fire, heater or under hot sun for long time
7. Do not expose pallet to corrosive chemical, acids or solvent
8. Do not drop pallet, apply excessive impact or hit with Forklift fork
9. Do not stack irregularly, with excessive concentrated load at center or at one side
10. Do not rack with pallet skids sit across racking bar
11. Always consult us when use the pallet in extreme cold and hot condition, in drive-through rack, ASRS system and for special purpose
12. Always exercise caution when handling pallet to prevent unnecessary injury, accident and damage
